GROUPED DEMONSTRATION CLASSES FOR EVALUATION AT SCHOOL

This is an example of the page that Altissima will return to the school.  
It groups some of the students into three demonstration classes.  
It is the same information received from the school, rearranged into demonstration classes.  
The random id number remains as an identifier with the birth data (date, time & location).  
This key will be matched with the school key page to find the names of the students.  
Classes may then be assembled and evaluated with complete privacy and confidentiality.  
(These are other classes, they don't match the school key and altissima data files.)

ranid            mm/dd/yyyy   24hh:mm            birth place
